

Putt Putt Risk Management Plan

HAZARDS	RISK ASSESSMENT	RISK CONTROLS
1. Site location delivery	Pedestrian traffic	Park truck outside of venue. Inspect access and observe pedestrian traffic
2. Site location area	Level of site/suitability to walk around golf course. Check for holes which may cause tripping.	Walk perimeter and internal space to enable safe playing area. Inspect playing surface. Fill any potholes and expose any hazards.
3. Erection and layout of golf course	Public walking through setup areas. Tripping over golf equipment.	Establish safe perimeters, keeping clear all pathways or exits.
4. Site location playing area	Location of playing course mats. Space between mats to walk.	Position mats to avoid golf balls being hit towards fence and public spectators. Check space in walkways
5. Players of golf	Not putting ball correctly. Standing in front of player putting ball.	Instructions to be given by signs and verbally to any staff and players
6. Players of Golf	Correct putters and balls for junior players	Observe height and age of players and give suitable clubs and balls to use
7. Stray golf balls out of playing area	Tripping by pedestrians and dangerous bouncing golf balls.	Observe players. Speak to players about putting. Retrieve all ball that go out of the area.
